

Pratyush Jaiswal

Bangalore, India | +91-8770953990 | pratyushjaiswal0806@gmail.com | [LinkedIn](#) | [GitHub](#)

Computer Science undergraduate specializing in Web Development and Machine Learning, with internship experience and research publications. Seeking Software Development or AI/ML internship opportunities to build scalable and intelligent systems.

EDUCATION

RV Institute of Technology and Management

Sep 2023 – Jul 2027

Bachelor of Engineering – Computer Science

SKILLS

Frontend: React.js, TypeScript, Tailwind CSS, Framer Motion

Backend & Database: Supabase, REST APIs, Node.js

Languages: JavaScript, TypeScript, Python, Java, SQL

Tools & Platforms: Git, GitHub, Vercel, Docker, AWS

Concepts: Full-Stack Development, UI/UX Design, Responsive Design, Authentication, Database Management

EXPERIENCE

Fancall – Frontend Development Intern | (Remote)

Jan 2026 -May 2026

- Developed responsive web interfaces and optimized UI performance.
- Collaborated with cross-functional teams to deliver scalable web solutions.

Frontend Developer Intern | Edunet Foundation (Remote)

Aug 2025 – Sep 2025

- Built interactive frontend components using HTML, CSS, and JavaScript.
- Implemented industry-level web development use cases and UI features.

Robofiesta Event Manager | RV Institute of Technology and Management

Oct 2025 – Nov 2025

- Led the planning and execution of a large-scale technical event.
- Managed logistics, operations, and coordination across multiple teams.

PROJECTS

Forus Health Care

Developing an ML and CNN-based solution to detect glaucoma, aiming to reduce diagnosis time from two days to approximately two hours. Currently under active development. (Under NDA)

Tech Token Heist

Developed a scalable real-time competition platform for a Google Developer Group event, featuring automated matchmaking, a token economy, live leaderboards, and admin controls for a multi-domain technical event. [\[Live Link\]](#)

Solar Panel Defect Detection System

Built and trained a YOLOv8-based defect detection system for solar panels to identify environmental and physical faults. Awarded **1st place among 60+ teams** at RVITM's Innovation & Design Thinking Exhibition. [\[GitHub\]](#)

Fancall – Frontend Development

Developed production-ready frontend interfaces for a creator–fan engagement platform by converting Figma designs into reusable React components, ensuring responsive performance across desktop, tablet, and mobile devices. (Under NDA)

CERTIFICATIONS

- Machine Learning Algorithms in Python – Udemy
- Web Development Fundamentals – IBM
- Introduction to IoT – Cisco
- Computer Networking – Scaler
- Operating Systems – Scaler
- AWS Solutions Architecture Job Simulation – Forage
- Deloitte Cyber Job Simulation – Forage
